AmTrustCyber Services

Did you know that strengthening your security posture can boost your business by increasing customer trust?

Increase the resilience and growth potential of your business by taking advantage of the following complimentary offerings available to AmTrustCyber policyholders.

Assessment & Consultation

Security Assessment and External Vulnerability Scan

Take advantage of a consultation session with a technical cybersecurity analyst from one of AmTrustCyber's trusted service partners. This session is designed to assess your organization's environment, IT infrastructure, and security practices. Actionable recommendations will be delivered to help your organization address security challenges and goals.

Incident Response Readiness Assessment

Is your team prepared to handle a suspected security incident? A complimentary session with a DFIR (digital forensic and incident response) expert will highlight opportunities and action steps to improve your organizational preparedness.

Virtual Tabletop Exercise

Preparation is the key to performance. This 2-hour session includes professional guidance and facilitation to prepare and assess your team's ability to respond to a potential security event. Help your team understand their roles in a critical situation and uncover opportunities for improvement in a team-building environment.

Google Workspace or Office 365 Security Review

Leverage our expert partners to assess the administrative security controls in your Google Workspace or Microsoft Office 365 environment. Find balance between security and operational efficiency while protecting your organization from identity or business email compromise.

Data Privacy Review

Data is among the most valuable assets in the world. Take advantage of a complimentary consultation to assess your organization's data privacy practices and regulatory requirement gaps.

Education/Training

Security Awareness Training

Your first defense against a breach is a well-educated team! Equip your organization with the necessary knowledge with complimentary security awareness training designed to help your employees identify and avoid social engineering and phishing attacks.

KnowBe4 Phishing Security Test

Find out what percentage of your employees are Phish-prone™ with a free phishing security test from KnowBe4. Navigate here (https://info.knowbe4.com/phishing-security-test-amtrust) to start your test for up to 100 users (no need to talk to anyone). Choose the landing page your users will see if they click and show users what red flags they missed. You'll receive a PDF within 24 hours with your Phish-prone™ % and industry comparison benchmarks. Policyholders are also eligible for exclusive discounts on KnowBe4's platform.

Tools

Managed Detection and Response (10 free licenses)

An easy-to-install security solution with no additional expense, headcount, or administration on your part; all managed by a team of security experts. MDR combines automated technology with human expertise to rapidly identify and limit risk. This security tool, professionally managed by a team of dedicated security experts, can help insureds protect their computers, their network, and their business. And it is easily accessible at no cost for your first 10 licenses - because better protection for business doesn't have to be complicated or expensive.
